

DIVYAM JAIN

647-334-0208 | Windsor ON | jaindivyam89@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

- Experienced Software Developer with 5+ years of expertise in full-stack development, specializing in backend architecture and server-side logic across multiple frameworks and platforms.
- Proven track record in the Software Development Lifecycle, delivering functional web applications and reusable libraries while collaborating in cross-functional teams to gather requirements and deliver scalable solutions.

TECHNICAL SKILLS

Languages: Python, PHP, Java, JavaScript, JQuery, SQL, HTML, CSS.

Frameworks/Libraries: Django, Laravel, Bootstrap, jQuery, TypeScript, React.

Databases: MySQL, PostgreSQL.

Developer Tools: JIRA, Postman, Git, Bitbucket, Docker, DevOps, GIS.

Methodologies/Concepts: Software Development Lifecycle, Agile, REST APIs, Design Patterns, Data Science, Big Data.

WORK EXPERIENCE

Software Developer | UST (formerly MobileComm Professionals) | Markham ON Sep 2023 – Present

- Developed an Inventory Manager that tracked technician-assigned assets, usage, and remaining stock, giving supervisors real-time visibility and reducing manual tracking effort by **70%**.
- Partnered with cross-functional business stakeholders to translate complex problems into technical requirements, ensuring solutions were practical and widely adopted.
- Built scalable and secure REST APIs and functional web applications, enabling seamless integration and reducing manual effort across the system.
- Troubleshooting and supporting production applications to resolve high-priority issues, reducing downtime and improving user experience.
- Re-engineered backend workflows and optimized database queries, improving response times by over **60%** and ensuring a seamless experience for end-users during peak traffic events.

Software Developer | Happly.ai | Montreal QC Jan 2025 – Aug 2025

- Created UI components for subscription plans with Stripe integration, enabling smooth and secure client sign-ups for a SaaS-based platform.
- Designed and implemented the group management feature with role-based access control, taking ownership of the product quality from planning to delivery.
- Improved and optimized the two-way communication feature, while troubleshooting critical performance bottlenecks to make member interactions more reliable.
- Contributed to a SaaS-based platform designed to help businesses and individuals secure funding opportunities.
- Collaborated in an Agile software environment, actively participating in sprint planning and retrospectives to drive engineering culture and incremental solutions.

Software Developer | UST (formerly MobileComm Professionals) | Gurgaon INDIA Feb 2021 – July 2023

- Wrote and executed unit, functional, and acceptance tests to validate backend workflows, improving reliability and reducing production bugs by **25%**.
- Built an RF Calculator tool that automated calculations, cutting manual computation time by **50%** and increasing accuracy by **30%** to improve operational efficiency.
- Revamped and migrated an MVC-based codebase to an HMVC-compliant architecture, reducing code redundancy and enhancing website performance and shipping capabilities by **70%**.
- Documented system workflows and technical requirements, improving communication skills and knowledge sharing across engineering and product teams.

PROJECTS

NEXPULSE | [link](#)

Tech: Python, React, Django, HTML5, CSS, Machine Learning

- Built a full-stack social media platform protecting elderly users from online fraud using AI for real-time scam detection, enhancing digital literacy.

TCP CLIENT SERVER | [link](#)

Tech: C, TCP, Linux, Socket Programming

- Engineered an asynchronous C-based TCP client-server system using socket programming, incorporating a distributed active-passive high availability clustering architecture for optimal load balancing.

EDUCATION

Master of Applied Computing | University of Windsor, Windsor, ON

Sep 2023 – Dec 2024

Bachelor of Computer Science and Engineering | Chitkara University, Rajpura, INDIA

Aug 2016 – July 2020
